

THE HORTON FEATURES

HORTON CUSTOMIZATION

DESIGN IN EVERY DETAIL.

Horton redefines and reimagines safety, design and style with the ultimate customized ambulance.

Your Horton ambulance is an investment in your future. That's why we begin each ambulance design with a clean slate and develop it with your firsthand experience and our deep expertise. We offer extensive customization options so you can make your Horton look as good as it performs and reflect your individualized needs and preferences.

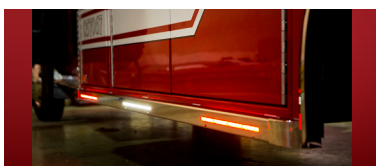

KEY ADVANTAGES

- ▶ **ADVANCED CUSTOMIZATION**
- ▶ **DESIGN LAB/IN-HOUSE DESIGN EXPERTS**
- ▶ **DISTINCTIVE STYLE**

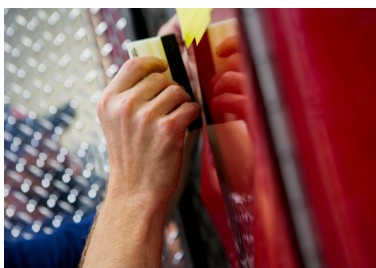

■ ■ CUSTOM BACKLIT FEATURES

Horton was the first ambulance manufacturer to offer custom backlit features. Our customization experts help you create a sleek, individualized look that reflects your department's spirit with quality down to the last detail. We can engrave your logo, name or messaging into the risers, stepwells and countertops, then backlight them so your ambulances can be easily identified. The lights automatically come on with the headlights or door switch, or can be operated with a simple push of a button on the Power-Tech by Horton™ monitor.

■ ■ RUB-RAIL LIGHTS

Make your ambulance truly stand out and increase its visibility with our custom rub-rail lights that illuminate the pattern of a heartbeat on an EKG. The lights activate and remain on when the parking lights are activated. If the vehicle is in drive with its emergency lights on, the rub-rail lights flash like they normally would on a call to further enhance visibility.

■ ■ CUSTOM GRAPHICS

At Horton, our dedicated graphics department does it all, from lettering and striping all the way to full wraps. Our experts work with you in real time to adjust the graphics on a digital image before placing them on your ambulance. That way, you get the exact look you want to reflect the quality and pride of your department. We even have the capability to carefully wrap individual pieces and align them on the ambulance to ensure a flawless appearance. And because it's all integrated into our manufacturing process, this customization is seamless.

THE HORTON DIFFERENCE

All Horton ambulances come standard with the features you know and trust for strength and safety.

STRENGTH AND SAFETY

HOPS™ featuring MBrace™

The first ambulance patient compartment safety system that protects in both frontal impacts and rollover events.

The Horton Legendary Body™

Engineered and constructed to deliver the ultimate in strength and safety.

Tested Beyond the Limits

Designed and built to exceed industry testing standards.

Horton QuietGuard™

Exclusive sound deadening so crews can perform at their best.

Horton Vi-Tech™ Mounting System

Superior strength, ensuring body-to-frame integrity.

HO₂rton System™

Designed and tested to function virtually failure free.

DISTINCTION IN EVERY DETAIL

Horton Advanced Customization

You're the expert on your department's needs, and we're the experts at getting it done.

Horton Design Culture

You're investing in your future. We're driven to do more for you than most think possible.

Horton Distinctive Style

Safety, functionality and style aren't mutually exclusive, so you can make your Horton look as good as it performs.
